Expected impact

Evidence quality **40/100** (moderate) · data completeness **47%**

OUTCOME	P50	P10 – P90	UNIT	UNCERTAINTY
People · women	**17**	5 – 54	depth-weighted person-years	wide

Evidence plan

1. **Compare with a group that did not get the product (a comparison group or a credible baseline), ideally run by someone independent.** Moves evidence from level 2 to 3, nets out deadweight and narrows the range (now ×10.6 from P10 to P90).
2. **Have the headline reach figure (85 women) verified by a third party.** Reach drives most of the remaining uncertainty.
3. **Back the main figures with data: monitoring records, surveys or audited accounts.** Evidence quality is moderate (40/100).

Recommendations

- Strengthen outcome measurement: define WHAT outcomes you contribute to with specific metrics
- Assess CONTRIBUTION: establish counterfactual or benchmark comparison
- Evaluate RISK: assess evidence risk, execution risk, and external risk factors

Impact targets as investment conditions

No binding impact targets have been set yet. Suggested conditions, drawn from the evidence plan and the company's own targets, for the committee to adopt, amend or drop:

TYPE	SUGGESTED CONDITION	WHEN	WHY
Condition precedent	Have the headline reach figure (85 women) verified by a third party.	before closing	Reach drives most of the remaining uncertainty.
Covenant	Compare with a group that did not get the product (a comparison group or a credible baseline), ideally run by someone independent.	study commissioned within 18 months of closing	Moves evidence from level 2 to 3, nets out deadweight and narrows the range (now ×10.6 from P10 to P90).
Reporting requirement	Back the main figures with data: monitoring records, surveys or audited accounts.	in each annual report	Evidence quality is moderate (40/100).
