Recommendation

Evidence plan required

Not a negative finding: the evidence plan below lists what to collect, biggest effect on the answer first.

- evidence quality moderate (40/100, needs 60)
- the range is too wide to decide on (x10.6 from P10 to P90, needs x8 or less)

Evidence quality: 40/100 · moderate

Expected impact	Evidence quality	Top SDG	Greenwashing risk
17 depth-weighted person-years · P10 5 – P90 54	**40**/100 moderate · 47% core metrics	5 **SDG 5** Gender Equality · 38/100	**48**/100 Moderate risk · finding threshold 60

What would change our mind

The evidence that would narrow the range most, in order.

1. **Compare with a group that did not get the product (a comparison group or a credible baseline), ideally run by someone independent.**
   Moves evidence from level 2 to 3, nets out deadweight and narrows the range (now ×10.6 from P10 to P90).

2. **Have the headline reach figure (85 women) verified by a third party.**
   Reach drives most of the remaining uncertainty.

3. **Back the main figures with data: monitoring records, surveys or audited accounts.**
   Evidence quality is moderate (40/100).

Expected impact

How much change, for whom, and how sure we are. Reach × depth × duration, less what would have happened anyway, credited to the company and weighted by the chance it happens. Ranges come from the evidence behind each figure.

Evidence quality

moderate · NESTA 2

Data completeness

47%

of the sector's core metrics reported

People · women

17 depth-weighted person-years

P10 5 P50 17 P90 54

wide uncertainty: P90 is ×10.6 the P10

What goes into it

Reach	85	85 women reported (NESTA 2); also reported, not the headline: 45,000 clients
Depth of change	32%	32% change reported (NESTA 2)
Duration (years)	2	typical for fintech
Without deadweight	70%	no comparison group: ~30% would have happened anyway

What drives the uncertainty

Reach	**30%**
Duration (years)	**29%**
Depth of change	**29%**

> “We employ 180 permanent staff (OI8869: 180), including 85 women (OI6213: 85) and 12 female managers (OI1571: 12).”

Attribution	70%	share credited to the enterprise
Probability of success	65%	evidence level 2

Impact at a glance

Material SDGs and how the company's activities lead to outcomes, from the claims in the documents.

- SDG 5 · Gender Equality — 38
- SDG 1 · No Poverty — 38
- SDG 8 · Decent Work and Economic Growth — 37
- SDG 9 · Industry, Innovation and Infrastructure — 36
- SDG 2 · Zero Hunger — 35
- SDG 10 · Reduced Inequalities — 33

WHAT THEY DO

BrightPath Finance is a digital microfinance platform providing affordable credit and savings products to smallholder farmers and women-led micro-enterprises...

OUTPUTS

Nothing reported yet

OUTCOMES

We serve 45,000 clients (PI4060: 45,000), 68% of them women.

We employ 180 permanent staff (OI8869: 180), including 85 women (OI6213: 85) and 12 female managers (OI1571: 12).

Revenue grew 32% last year (FP4761: 32%).

TARGETS

Nothing reported yet

Five Dimensions of Impact

Scored 1–5. The tick shows the sector benchmark where one exists.

partial evidence

Company score

Sector prior (illustrative: GIIN publishes no 5D scores; context from the sector reports cited) — Microfinance / fintech impact funds; n≈74 (GIIN 2023)

Contribution: enterprise and investor

Enterprise contribution

30/100

Evidence level 2 · no comparison yet, so part of the change may have happened anyway

Investor contribution

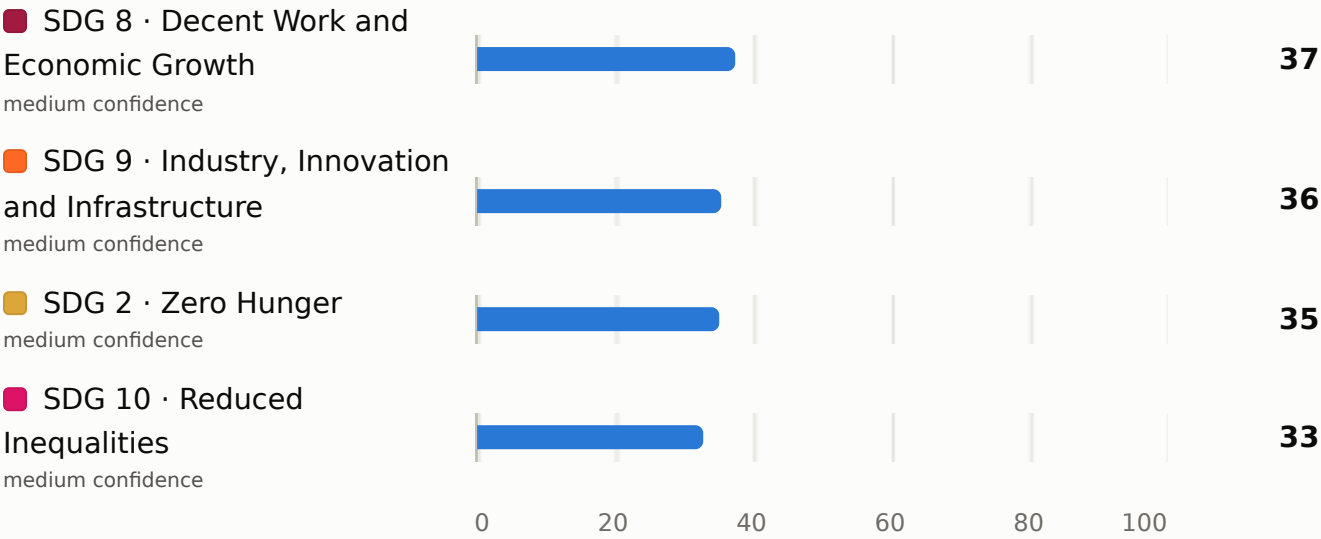

0/100

Not described in these documents. Add the fund's role from the investment memo.

SDG alignment

Material goals only (claimed, inferred from the business, or evidenced by a goal-specific metric), scored 0–100.

Other goals (context only): 3, 4, 6, 7, 11, 12, 13, 14, 15, 16

Evidence ledger

Every claim found in the documents and every metric used in scoring.

Claims (5)

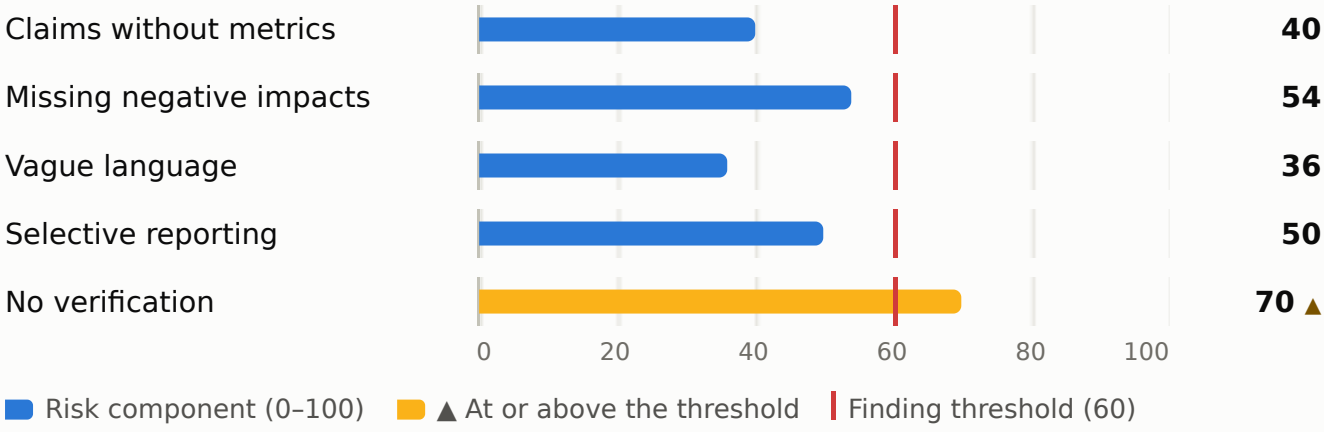

Claim	Type	NESTA level	Evidence	Metric
We serve 45,000 clients (PI4060: 45,000), 68% of them women. p. 3	outcome	●●○○○	—	**PI4060** Client Individuals: Total
We employ 180 permanent staff (OI8869: 180), including 85 women (OI6213: 85) and 12 female managers (OI1571: 12). p. 4	outcome	●●○○○	—	**OI8869** Permanent Employees: Total
Revenue grew 32% last year (FP4761: 32%). p. 5	outcome	●●○○○	—	—
Portfolio at risk over 30 days is 3.1%. p. 5	outcome	●●○○○	—	—
Our own footprint is 120 tCO2e (OI1479: 120 tCO2e), of which 80 tCO2e are direct Scope 1 emissions (OI4112: 80 tCO2e). p. 5	outcome	●●○○○	—	**OI1479** Greenhouse Gas Emissions: Total **OI4112** Greenhouse Gas Emissions: Direct (Scope 1)

Metrics (8)

Metric	Value	Origin
FP4761 · Revenue Growth	32%	reported
OI1075 · Board of Directors: Total	7	reported
OI1479 · Greenhouse Gas Emissions: Total	120 tCO2e	extracted from text
OI1571 · Full-time Employees: Female Managers	12	reported
OI4112 · Greenhouse Gas Emissions: Direct (Scope 1)	80 tCO2e	extracted from text
OI6213 · Full-time Employees: Female	85	reported
OI8869 · Permanent Employees: Total	180	extracted from text
PI4060 · Client Individuals: Total	45,000	extracted from text

Greenwashing review — 48/100 · Moderate risk

Components of the 0–100 risk score. At 60 or above risk is a finding; below it mostly reflects missing data.

Flags: No evidence of third-party verification or auditing

Risks and opportunities

Potential negative impacts

Harms a business like this can cause, scored severity × likelihood (ESRS impact materiality). A control described in the documents lowers likelihood. Unaddressed

material items are questions for diligence, not findings.

Negative impact	Severity	Likelihood	Materiality	Control in the documents
Clients become over-indebted borrowers	3/3	1/3	3/9 · moderate	Described “Over-indebtedness is our main client risk: we check credit bureau data, cap loan sizes against cash flow and train loan officers on responsible lending.” “BrightPath Finance is a digital microfinance platform providing affordable credit and savings products to smallholder farmers and women-led micro-enterprises…”
Misuse or breach of clients' personal and financial data clients	2/3	1/3	2/9 · low	Described “Data privacy: client data is encrypted and we comply with Kenya's Data Protection Act.”
Opaque or abusive pricing and collection practices borrowers	2/3	1/3	2/9 · low	Described “We have a published Client Protection Policy (OI4753) and run NPS surveys plus a grievance system (OI5049).”

Exclusion-list topics the documents mention

The company names these topics while denying, guarding against or replacing them. That is not a finding. Confirm each one in due diligence.

- **Predatory Lending**

  > “Over-indebtedness is our main client risk: we check credit bureau data, cap loan sizes against cash flow and train loan officers on responsible lending.”

Disclosed in the documents

- Over-indebtedness is our main client risk: we check credit bureau data, cap loan

Opportunities

- Financial inclusion: providing access to financial services for the unbanked

sizes against cash flow and train loan officers on responsible lending. Data privacy: client data is encrypted and we comply with Kenya's Data Protection Act.
- Portfolio at risk over 30 days is 3.1%.

Typical for the sector — check in diligence

- Over-indebtedness: risk of predatory lending to vulnerable populations
- Data privacy: risks around financial data security and misuse
- Digital exclusion: services inaccessible to those without smartphones/internet

- Economic empowerment: enabling savings, credit, and insurance
- Gender equity: improving financial access for women
- Efficiency: reducing transaction costs for low-income users

Action plan

De-duplicated next steps, most important first.

#	Action plan	Area
1	Coverage is below 60%. Focus on closing gaps in the IRIS+ Core Metric Set to achieve baseline compliance.	Metrics
2	Priority missing metrics: FP2635 (Non-Performing Loans (Portfolio at Risk): 30 Days), OD8350 (Client Model), OI4753 (Client Protection Policy), OI5049 (Client Feedback System), PI9319 (Client Retention Rate)	Metrics
3	Strengthen outcome measurement: define WHAT outcomes you contribute to with specific metrics	Impact
4	Assess CONTRIBUTION: establish counterfactual or benchmark comparison	Impact
5	Evaluate RISK: assess evidence risk, execution risk, and external risk factors	Impact
6	Report the negative impacts that matter for fintech, e.g. Effective Interest Rate (EIR) (PI7467); Repayment Capacity Analysis (PI4733); Client Protection Policy (OI4753)	Evidence quality
7	Include risk-oriented and negative-impact metrics alongside positive outcomes	Evidence quality

#	Action plan	Area
8	Obtain third-party verification or implement a recognized measurement framework	Evidence quality
9	Report Non-Performing Loans (Portfolio at Risk): 30 Days (FP2635); Board of Directors: Female (OI8118); Product Targeted to Women (PD5677) to strengthen SDG 5 evidence (2/168 currently tracked)	SDGs
10	Add impact themes: Diversity And Inclusion, Employment	SDGs

Methodology and definitions

How this report was produced

- Claims are extracted from the documents and graded on the NESTA standards of evidence; quantities are mapped to IRIS+ metric IDs only when unit and context are unambiguous.
- Five Dimensions scores (1–5) come from reported metrics where available and from document text otherwise; the evidence label says which.
- SDG scores (0–100) combine goal-specific metric coverage, inference from the business and impact themes; cross-cutting metrics count at reduced weight.
- Greenwashing risk weights claim–metric gaps (30%), missing negative impacts (20%), vague language (20%), selective reporting (15%) and lack of verification (15%).
- The IC gate applies the fund thesis thresholds; failures caused by missing data are reported as insufficient evidence, not as a negative finding.
- Scores use methodology v1.2.0 (config e0d5e058eba0); reports are comparable only when both match.
- Expected impact (methodology 2.2.0, illustrative): reach × depth × duration × (1 − deadweight) × attribution × probability of success; each factor's spread follows its NESTA evidence level; 4000 seeded Monte Carlo draws give P10/P50/P90. Evidence quality and data completeness are reported separately, never multiplied in.

AI & automation disclosure

Automated analysis: produced by rules and a deterministic scoring model; no generative AI was used. 2 of 21 scores are estimated from document text rather than reported metrics. Review before relying on it.

Claim extraction	rules
Score calculation	deterministic model
Metric / SDG tagging	rules
Narrative drafting	not used

Disclosed under the EU AI Act Art 50 transparency rules.

Terms used in this report

Impact claim
: A statement in a pitch deck or report about the change a company creates ("we connected 42,000 households"). Impact Vision extracts each claim, maps it to a metric where possible and grades how well it is evidenced.

IRIS+
: The Global Impact Investing Network's catalogue of standard impact metrics (about 790 in version 5.3c), each with a short ID such as OI2764 for "Greenhouse Gas Emissions Avoided". Using the same IDs makes results comparable across companies and funds.

Core metric set
: The short list of IRIS+ metrics a company in a given sector should report. Coverage is the share of that list the company reports; Impact Vision picks the list by sector.

Five Dimensions of Impact (5D)
: The Impact Management Project's framework for describing impact: What outcome occurs, Who experiences it, How Much change (scale, depth, duration), the investor's and company's Contribution compared with what would have happened anyway, and the Risk that impact doesn't happen. Impact Vision scores each dimension from 1 to 5.

Evidence-based / partial / estimated
: How a score was derived. Evidence-based scores rest on several reported metrics; partial scores on a few; estimated scores only on the text of the documents. Treat estimated scores as a starting hypothesis, not a finding.

SDG alignment
: How strongly the company's activities and metrics relate to each of the 17 UN Sustainable Development Goals (0-100). A goal is "material" when the company claims it, its business clearly relates to it, or it reports a goal-specific metric; other goals are context only.

NESTA standards of evidence
: A five-level scale for how strong evidence of impact is: 1 = a narrative, 2 = data showing change, 3 = a comparison or control group suggesting the company caused it, 4-5 = independent or replicated rigorous evaluations.

Third-party verification
: An independent organisation (auditor, certifier, regulator) has checked a figure or practice. It raises confidence in a claim and lowers greenwashing risk.

Additionality
: Whether the outcome would have happened anyway without the company or investor. Strong additionality means the impact depends on them.

Greenwashing (impact-washing) risk
: A 0-100 score of how far a company's claims run ahead of its evidence: vague language, claims without metrics, missing negative impacts, selective reporting and no verification. Below 60 it mostly reflects missing data; at 60 or above it is a finding in itself.

Due diligence (DD) coverage

The share of the impact due-diligence questions (universal plus the company's sector) that the documents already answer. Low coverage means more questions to ask, not a bad company.

IC gate
: The fund's minimum thresholds before a deal goes to the investment committee (5D score, top SDG score, DD coverage, greenwashing risk, exclusions). "Insufficient evidence" means the failures are missing data; "Fail" means a negative finding.

Scope 1, 2 and 3 emissions
: Greenhouse-gas emissions from a company's own operations (Scope 1), from the energy it buys (Scope 2) and from its value chain (Scope 3), as defined by the GHG Protocol.

tCO2e
: Tonnes of carbon-dioxide equivalent: a common unit that converts all greenhouse gases to the warming effect of CO2.

ESRS / CSRD / VSME
: The EU sustainability reporting rules (CSRD) and their standards (ESRS). The revised ESRS became law in September 2026 and apply from 2027. VSME is the voluntary standard for smaller companies; from 2027 large reporters may not ask partners with up to 1,000 employees for more than VSME data.
