Recommendations

- Measure HOW MUCH: track scale (# stakeholders), depth (degree of change), and duration
- Assess CONTRIBUTION: establish counterfactual or benchmark comparison
- Evaluate RISK: assess evidence risk, execution risk, and external risk factors

Impact targets as investment conditions

No binding impact targets have been set yet. Suggested conditions, drawn from the evidence plan and the company's own targets, for the committee to adopt, amend or drop:

TYPE	SUGGESTED CONDITION	WHEN	WHY
Covenant	Report progress against the company's own target: “Over the next five years we target: 45% reduction in Scope 1+2 emissions intensity (kg CO2e / kg live weight); 80% of breeding sows in group-housing >= 10 weeks after weaning; 35 outgrower households onboarded; and a SBTi near-term target submission by 2027.”	reported every year	The company states this target; a covenant makes it binding rather than aspirational.
Reporting requirement	Report the sector's core metrics: Payments to Supplier Individuals: Smallholder, Water Withdrawn, Waste Produced: Total.	in each annual report	Only 18% of the core set is reported.

Recommendation

> **Ready for IC** — Expected impact is quantified and the evidence is good enough for the investment committee.

Note: Ready, with 18% of the core metric set reported.
