Confidential — prepared for internal investment and LP use.

Recommendation

❗ Not IC-ready — insufficient evidence

The failed checks reflect missing evidence, not negative findings. Collect the missing metrics and DD answers, then re-screen.

- 5D overall score 1.8 (min 2.5) (missing data)
- DD checklist coverage 43.4 (min 70) (missing data)
- Greenwashing risk 58.9 (max 40) (missing data)

Confidence: partly evidenced — some scores rest on a few reported metrics.

What would change our mind

The three pieces of evidence that would move this assessment most.

1 Report Social and Environmental Targets (OD4091)

Contribution is the weakest dimension (1.5/5, estimated); this is a core metric for the sector.

2 Independent verification of the headline claims

No third-party verification or audit was found for the main outcomes.

3 Outcome evidence with a baseline or comparison group

Most claims show change but not attribution (NESTA level 2); a comparison moves them to level 3.

Impact at a glance

Material SDGs and how the company's activities lead to outcomes, from the claims in the documents.

SDG 13 · Climate Action		66
SDG 10 · Reduced Inequalities		42
SDG 2 · Zero Hunger		41
SDG 1 · No Poverty		40
SDG 5 · Gender Equality		40
SDG 8 · Decent Work and Economic Growth		40

WHAT THEY DO

BrightPath Finance is a digital microfinance platform providing affordable credit and savings products to smallholder farmers and women-led micro-enterprises...

OUTPUTS

Nothing reported yet

OUTCOMES

We serve 45,000 clients (PI4060: 45,000), 68% of them women.

Revenue grew 32% last year (FP4761: 32%).

Portfolio at risk over 30 days is 3.1%.

TARGETS

Nothing reported yet

Five Dimensions of Impact

Scored 1-5. The tick shows the sector benchmark where one exists.

Company score | Sector benchmark — Microfinance / fintech impact funds; n≈74 (GIIN 2023)

 SDG alignment

Material goals only (claimed, inferred from the business, or evidenced by a goal-specific metric), scored 0–100.

Other goals (context only): 6, 7, 3, 4, 11, 15, 12, 14

 Evidence ledger

Every claim found in the documents and every metric used in scoring.

Claims (4)

Claim	Type	NESTA level	Evidence	Metric
-------	------	-------------	----------	--------

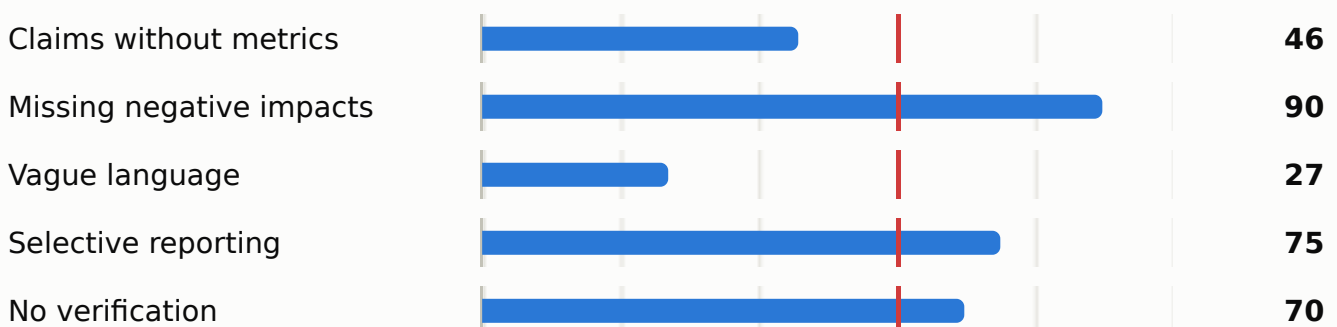

Claim	Type	NESTA level	Evidence	Metric
We serve 45,000 clients (PI4060: 45,000), 68% of them women.	outcome	●●○○○	—	PI4060
Revenue grew 32% last year (FP4761: 32%).	outcome	●●○○○	—	—
Portfolio at risk over 30 days is 3.1%.	outcome	●●○○○	—	—
Our own footprint is 120 tCO2e (OI1479: 120 tCO2e), of which 80 tCO2e are direct Scope 1 emissions (OI4112: 80 tCO2e).	outcome	●●○○○	—	OI1479

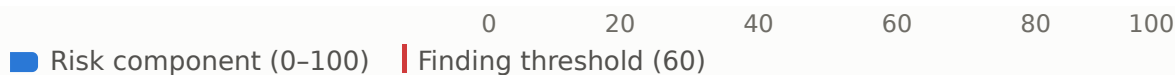

Metrics (8)

Metric	Value	Origin
FP4761 · Revenue Growth	32%	reported
OI1075 · Board of Directors: Total	7	reported
OI1479 · Greenhouse Gas Emissions: Total	120 tCO2e	extracted from text
OI1571 · Full-time Employees: Female Managers	12	reported
OI4112 · Greenhouse Gas Emissions: Direct (Scope 1)	80 tCO2e	reported
OI6213 · Full-time Employees: Female	85	reported
OI8869 · Permanent Employees: Total	180	reported
PI4060 · Client Individuals: Total	45,000	extracted from text

Greenwashing review — 59/100 · Moderate risk

Components of the 0–100 risk score. At 60 or above risk is a finding; below it mostly reflects missing data.

Flags: Missing negative-impact metrics for sector; Reporting appears to cherry-pick positive metrics; No evidence of third-party verification or auditing

Risks and opportunities

Disclosed in the documents

- Portfolio at risk over 30 days is 3.1%.
- Over-indebtedness is our main client risk: we check credit bureau data, cap loan sizes against cash flow and train loan officers on responsible lending.

Typical for the sector — check in diligence

- Over-indebtedness: risk of predatory lending to vulnerable populations
- Data privacy: risks around financial data security and misuse
- Digital exclusion: services inaccessible to those without smartphones/internet

Opportunities

- Financial inclusion: providing access to financial services for the unbanked
- Economic empowerment: enabling savings, credit, and insurance
- Gender equity: improving financial access for women
- Efficiency: reducing transaction costs for low-income users

Action plan

De-duplicated next steps, most important first.

#	Action plan	Area
1	Coverage is below 60%. Focus on closing gaps in the IRIS+ Core Metric Set to achieve baseline compliance.	Metrics
2	Priority missing metrics: FP2635 (Non-Performing Loans (Portfolio at Risk): 30 Days), OD4091 (Social and Environmental Targets), OD8350 (Client Model), OI1582 (Wage Equity), OI4724 (Workers Earning a Living Wage or Higher)	Metrics
3	Strengthen outcome measurement: define WHAT outcomes you contribute to with specific metrics	Impact
4	Measure HOW MUCH: track scale (# stakeholders), depth (degree of change), and duration	Impact

#	Action plan	Area
5	Assess CONTRIBUTION: establish counterfactual or benchmark comparison	Impact
6	Evaluate RISK: assess evidence risk, execution risk, and external risk factors	Impact
7	Map each SDG claim to at least one IRIS+ metric with reported data	Evidence quality
8	Report adverse-impact metrics appropriate for fintech sector (e.g., GHG emissions, client protection)	Evidence quality
9	Include risk-oriented and negative-impact metrics alongside positive outcomes	Evidence quality
10	Obtain third-party verification or implement a recognized measurement framework	Evidence quality

Methodology and definitions

How this report was produced

- Claims are extracted from the documents and graded on the NESTA standards of evidence; quantities are mapped to IRIS+ metric IDs only when unit and context are unambiguous.
- Five Dimensions scores (1–5) come from reported metrics where available and from document text otherwise; the evidence label says which.
- SDG scores (0–100) combine goal-specific metric coverage, inference from the business and impact themes; cross-cutting metrics count at reduced weight.
- Greenwashing risk weights claim-metric gaps (30%), missing negative impacts (20%), vague language (20%), selective reporting (15%) and lack of verification (15%).
- The IC gate applies the fund thesis thresholds; failures caused by missing data are reported as insufficient evidence, not as a negative finding.

Terms used in this report

Impact claim

A statement in a pitch deck or report about the change a company creates ("we connected 42,000 households"). Impact Vision extracts each claim, maps it to a metric where possible and grades how well it is evidenced.

IRIS+

The Global Impact Investing Network's catalogue of standard impact metrics (about 790 in version 5.3c), each with a short ID such as OI2764 for "Greenhouse Gas

Emissions Avoided". Using the same IDs makes results comparable across companies and funds.

Core metric set

The short list of IRIS+ metrics a company in a given sector should report. Coverage is the share of that list the company reports; Impact Vision picks the list by sector.

Five Dimensions of Impact (5D)

The Impact Management Project's framework for describing impact: What outcome occurs, Who experiences it, How Much change (scale, depth, duration), the investor's and company's Contribution compared with what would have happened anyway, and the Risk that impact doesn't happen. Impact Vision scores each dimension from 1 to 5.

Evidence-based / partial / estimated

How a score was derived. Evidence-based scores rest on several reported metrics; partial scores on a few; estimated scores only on the text of the documents. Treat estimated scores as a starting hypothesis, not a finding.

SDG alignment

How strongly the company's activities and metrics relate to each of the 17 UN Sustainable Development Goals (0-100). A goal is "material" when the company claims it, its business clearly relates to it, or it reports a goal-specific metric; other goals are context only.

NESTA standards of evidence

A five-level scale for how strong evidence of impact is: 1 = a narrative, 2 = data showing change, 3 = a comparison or control group suggesting the company caused it, 4-5 = independent or replicated rigorous evaluations.

Additionality

Whether the outcome would have happened anyway without the company or investor. Strong additionality means the impact depends on them.

Greenwashing (impact-washing) risk

A 0-100 score of how far a company's claims run ahead of its evidence: vague language, claims without metrics, missing negative impacts, selective reporting and no verification. Below 60 it mostly reflects missing data; at 60 or above it is a finding in itself.

Due diligence (DD) coverage

The share of the impact due-diligence questions (universal plus the company's sector) that the documents already answer. Low coverage means more questions to ask, not a bad company.

IC gate

The fund's minimum thresholds before a deal goes to the investment committee (5D score, top SDG score, DD coverage, greenwashing risk, exclusions). "Insufficient evidence" means the failures are missing data; "Fail" means a negative finding.

Scope 1, 2 and 3 emissions

Greenhouse-gas emissions from a company's own operations (Scope 1), from the energy it buys (Scope 2) and from its value chain (Scope 3), as defined by the GHG Protocol.

tCO2e

Tonnes of carbon-dioxide equivalent: a common unit that converts all greenhouse gases to the warming effect of CO2.
